

PDA navigation map - Put-away

Outlined in blue: the button or scan that leads to another screen. The arrow shows which.

Sign in and start the shift

The person signs in, sees what there is to do and starts. The engine has already chosen the next task.

01 - Sign in

Identify who is using the PDA, with username and password.

02 - Put-away home

Show the allPDA work, and get the person working with one tap; gives access to the look-ups and fixes they do on their own initiative.

03 - The queue, with the why

Show the tasks in order, and why each one is where it is.

Receive what arrives

The system does not know what is coming, when goods reach the dock, put-away logs the arrival. That creates the receiving task, which the engine puts in the queue by priority. It is checked against the supplier note, goes into stock, and the put-away tasks go back to the engine.

04 - Log the arrival

Log the arrival, the system does not know what is coming, so this is where the goods enter the system.

05 - Arrival logged

Confirm the arrival is logged and the receiving task went to the engine.

06 - Scan the supplier's delivery note

Start the receiving task: identify the delivery by the supplier's note.

07 - Check what arrived

Compare what was expected with what arrived.

08 - The quantity doesn't match

Record how much actually arrived, when it isn't what was expected.

09 - Received

Confirm it is in stock, and that the put-away tasks went to the engine, which sets their priority in the queue.

Put away a pallet

Take the pallet from the dock to the location, the engine suggests, and confirm by scanning the item and the location.

10 - Scan the item

Confirm that the pallet in front of the person is the one in the task.

11 - Go to suggestion 1 of 3

Say where to take the pallet, and why.

12 - Number 1 was taken

Record the location as taken and move on to the next suggestion.

13 - Scan the location

Confirm, by scanning, that the pallet is in the right location.

14 - Put away

Confirm the record and move on to the next task.

When put-away goes wrong

The detours - location taken, doesn't fit, damaged item, label that won't scan. Everything is recorded and the manager sees it.

15 - What's wrong?

Say, with one tap, what is stopping the put-away.

16 - Type the item

Identify the item when the label won't scan.

17 - Type the location

Identify the location when the label won't scan; counts towards adding a new label.

18 - Problem recorded

Confirm the problem is recorded and the manager has been told.

Fix a location (task)

The engine found stock in the wrong place and has it moved. It comes out of the source and goes into the destination, in a single record.

19 - Take from the source

Confirm the location and the item that came out.

20 - Put in the destination

Say where the stock goes, and confirm by scanning.

21 - Fixed

Confirm the stock has moved, in a single record.

Fix what is in a location

On their own initiative, wherever sees a location doesn't match the system fixes it right there. Nobody counts.

22 - Scan the wrong location

Identify the location that doesn't match the system.

23 - What's there?

Say how many pieces are actually in the location.

24 - Correction recorded

Confirm the correction; the manager sees the difference.

Look up

Find out where an item is, or what is in a location, without changing anything.

27 - Look up an item

See where an item is, and how much is in each place.

28 - Look up a location

See what is in a location and, if it doesn't match, fix it.

Take the empty pallet away

The pallet that became empty leaves the location and goes to the yard; the location is freed.

25 - Take it to the pallet yard

Take the empty pallet to the yard, and confirm by scanning the label.

26 - In the pallet yard

Confirm the location is now free.

The manager and exceptions

The manager follows the shift and the signals; anyone sees when the PDA loses its connection.

47 - No connection

Say the PDA isn't connected, and what was saved.
