03 - The queue, with the why

Show the tasks in order, and why each one is where it is.

Receive what arrives

The system does not know what is coming, when goods reach the dock, put-away logs the arrival. That creates the receiving task, which the engine puts in the queue by priority. It is checked against the supplier note, goes into stock, and the put-away tasks go back to the engine.

Arrival Marta Silva online

What arrived?

The system does not know what is coming. Say who brought it and how many pallets.

Scan the note, if it has a barcode
