

PDA navigation map

Outlined in blue: the button or scan that leads to another screen. The arrow shows which.

Sign in and start the shift

The person signs in, sees what there is to do and starts. The engine has already chosen the next task.

01 - Sign in
Identify who is using the PDA, with username and password.

02 - Put-away home
Show the shift's work and get the person working with one task given access to the look-up and fixes they do on their own initiative.

03 - The queue, with the why
Show the tasks in order, and why each one is where it is.

Receive what arrives

When goods arrive at the dock, a receiving task is created and the engine puts it in the queue by priority. It is checked against the supplier's note, goes into stock, and the put-away tasks go back to the engine.

04 - Scan the supplier's delivery note
Start the receiving task: identify the delivery by the supplier's note.

05 - Check what arrived
Compare what was expected with what arrived.

06 - The quantity doesn't match
Record how many actually arrived, when it isn't what was expected.

07 - Received
Confirm it is in stock, and that the put-away tasks went to the engine, which sets their priority in the queue.

Put away a pallet

Take the pallet from the dock to the location the engine suggests, and confirm by scanning the item and the location.

08 - Scan the item
Confirm that the pallet in front of the person is the one in the task.

09 - Go to suggestion 1 of 3
Say where to take the pallet, and why.

10 - Number 1 was taken
Record the location as taken and move on to the next suggestion.

11 - Scan the location
Confirm, by scanning, that the pallet is in the right location.

12 - Put away
Confirm the record and move on to the next task.

When put-away goes wrong

The detours - location taken, doesn't fit, damaged item, label that won't scan. Everything is recorded and the manager sees it.

13 - What's wrong?
Say, with one tap, what is stopping the put-away.

14 - Type the item
Identify the item when the label won't scan.

15 - Type the location
Identify the location when the label won't scan; counts towards adding a new label.

16 - Problem recorded
Confirm the problem is recorded and the manager has been told.

Fix a location (task)

The engine found stock in the wrong place and has it moved. It comes out of the source and goes into the destination, in a single record.

17 - Take from the source
Confirm the location and the item that come out.

18 - Put in the destination
Say where the stock goes, and confirm by scanning.

19 - Fixed
Confirm the stock has moved, in a single record.

Fix what is in a location

On their own initiative whoever sees a location doesn't match the system fixes it right there. Nobody counts.

20 - Scan the wrong location
Identify the location that doesn't match the system.

21 - What's there?
Say how many pieces are actually in the location.

22 - Correction recorded
Confirm the correction; the manager sees the difference.

Take the empty pallet away

The pallet that became empty leaves the location and goes to the yard; the location is freed.

23 - Take it to the pallet yard
Take the empty pallet to the yard, and confirm by scanning the label.

24 - In the pallet yard
Confirm the location is now free.

Look up

Find out where an item is, or what is in a location, without changing anything.

25 - Look up an item
See where an item is, and how much is in each place.

26 - Look up a location
See what is in a location and, if it doesn't match, fix it.

Pick an order

Picking does the round of the warehouse with the batch of orders, and leaves them on the staging shelf.

27 - The batch, already full
Shows the orders for the round, already chosen by the engine.

28 - Short quantity
Take the person to the location and say what to pick.

29 - Short quantity
Record what is missing and fix the stock right there.

30 - Take it to the staging shelf
Leave the orders on the staging shelf, and say where they are.

From the shelf to the truck

Shipping checks the loads and the signals; anyone sees the PDA loses its connection.

31 - Today's trucks
Show the trucks by closing time, and what is ready.

32 - Check parcel by parcel
Confirm each parcel before it leaves the shelf.

33 - Take it to the dock
Take the parcels to the truck's dock.

34 - Load and close the dispatch
Confirm each parcel that is loaded, and close the dispatch.

The manager and exceptions

The manager follows the shift and the signals; anyone sees when the PDA loses its connection.

35 - Shift report
Say the manager the shift figures and the signals that need attention.

36 - No connection
Say the PDA isn't connected, and what was saved.
